Options™

# Arc|Com Options™

**Options**, an extension of the Arc-Com Design Studio, is dedicated to the creation of custom textile products. Working within design schemes, specifications and budgets, the Options team of experienced designers and technical staff assist you in providing comprehensive textile solutions. Options design professionals understand color and end use requirements and have a thorough technical knowledge of fibers, finishes and fabric construction. They will assist you in creating or modifying textiles to increase durability, enhance fire resistance, improve stain repellency, meet or exceed industry standards or produce original design concepts. Options offers an endless range of alternatives that extend well beyond the Arc-Com line.

Vinyl

Crocodilla

## Upholstery

Existing Arc-Com products can be modified in a variety of ways. Adjust the scale to be smaller or larger, fiber content can be substituted or you can develop a custom color.

Enclosure

Riverview

## Drapery

Drapery fabrics we offer include: semi-opaque, opaque or sheers in a wide variety of colors and constructions. Most are either inherently flame resistant or can be treated to pass NFPA 701.

Multi-purpose fabrics allow the designer flexibility in using these patterns and color schemes for more than one application. This capability allows us to offer our clients fabrics that are suitable for both bedding and drapery.

## Multi-purpose

*Mystic Morn*

*Mediterranean Sedge*

(u)phoria!™ printed vinyl featuring MorCare™ high performance finish, meets the increased demands of healthcare, contract and institutional use. With 500,000 double rubs, enhanced bleach cleanability and mildew / bacteria (Staph) resistance, (u)phoria!™ is a great solution for high traffic areas.

**(u)phoria!™**

## Logos

Graphics and logos can be added to a wide range of materials that include woven or printed goods. Customizing a fabric or vinyl with your own insignia, is a great option for universities, institutions and corporations to market their brand.

R Logo

Nailah

## Laser Cut

Laser cut technology allows for the creation of unique designs for only a 5-yard minimum. Patterns can be designed to be geometric, organic, botanical or even a logo. The possibilities are endless when using this innovative technique to create a design.
