DURABLOCK[®]

LIQUID BARRIER

DURABLOCK®

LIQUID BARRIER

NANO-TEX® + DURABLOCK® IS A HIGH PERFORMANCE COMBINATION FOR EXTREME ENVIRONMENTS.

It couples the permanent stain protection of nanotechnology with a breathable liquid barrier to protect the cushion of any upholstery from being exposed to liquid. This combination provides a complete barrier to liquids, cleaner, and contaminants making the application easily cleanable. Nano-Tex® + DuraBlock® can be applied to virtually any textile designed for high-traffic areas such as a restaurant, bar, waiting room, or a hotel lobby!

The Nano-Tex® + DuraBlock® combination is easily maintained with any cleaner in the harshest environments. The 100% polyester backing will extend the life of your fabric, furniture and cushion, ultimately lowering replacement costs. Don't hesitate to ask us to put its performance to the test in our A2LA accredited testing lab!

NANOTEX®
+ **DuraBlock®**

- + **APPLICATIONS** Upholstery, Indoor and Outdoor, Headboard
- + **MARKETS** Healthcare, Hospitality, Institutional, Higher Education, Entertainment, Cruise Lines, Extreme Environments
