

WriteOutTM

Ink Resistant Technology

by Arc|Com

Goodbye Oops, Hello Clean.

WriteOut is a proprietary ink resistant technology for faux leather that offers the highest level of cleanability. With its repel & release stain-inhibiting system, WriteOut prevents ink and other stains from setting into the material and allows for easy cleaning. WriteOut also offers excellent cleaning of other tough food and healthcare stains including Mustard, Coffee, Red Wine, Iodine, or Blood.

WriteOut offers unparalleled resistance to graffiti and ink marks. The proprietary repel & release technology is engineered to repel ink preventing it from setting in, allowing any remaining residue to release over time.

Simply clean ink marks with a dry cloth. If some stain residue is still present spray it with a 70% dilution of isopropyl alcohol and wipe clean.

Note: Removal of ink, particularly permanent marker, may vary depending on the period of time that the ink sets in. While this material offers excellent protection, full removal is not guaranteed.

Get Creative! But Not on Your Furniture.

Those Skinny Jeans Look Fabulous on You!

....Not on Your Upholstery.

There's nothing quite like that perfect pair of jeans. But nothing stains quite like indigo denim dye either. Apparel manufacturers and retailers go as far as tagging labels on jeans, warning that indigo dye may rub off onto light colored upholstery. Your jeans, while flattering on you, are the bane of your furniture's existence. Until now...

Note: Removal of indigo dye may vary depending on the type of denim. While this material offers excellent protection, full removal is not guaranteed.

The lighter the color of the seat, the more likely a PB & J sandwich will land face down on it. Likewise, wine, coffee, or ketchup will inevitably find their way onto the seating as well. Now they've met their match. WriteOut prevents even the most notorious of foods from staining the upholstery.

Easily clean spills with a dry cloth. If stains have dried and are persistent, remove the with mild soap and water.

You'll Have to Leave Something Else to Remember You By.

Endures Healthcare Environments.

Healthcare interiors — whether doctor's offices, hospitals, or nursing homes — all get their fair share of messes to clean up. Be it iodine, blood, other bodily fluids, none are too dirty to handle for WriteOut, and can all easily be wiped away. As importantly, materials with WriteOut are engineered to withstand bleach (20%), alcohol (70%) and many commonly used soft surface disinfectants.

Note: Please visit www.arc-com.com/WriteOut for cleaning instructions.
